EXTRA STRENGTH EXTREME CRYO GEL™

USAGE GUIDE

EXTREME CRYO GEL™ is for external use only. Keep away from the eye area and open wounds. Always keep *EXTREME CRYO GEL™* and other products similar out of reach of children. After using *EXTREME CRYO GEL™*, it is recommended that you wash your hands with cool water to prevent accidentally rubbing your eyes. Please protect *EXTREME CRYO GEL™* from extreme heat and cold temperatures to ensure product quality.

EXTREME CRYO GEL™ works quickly for many people. Apply a dime size amount of *EXTREME CRYO GEL™* to the affected area as often as needed. It may take a day or two for results, so do not give up after the first use.

The word "CRYO" derives from Greek terminology, meaning cold or icy. The cool feeling you will receive will get you back into enjoying life in no time.

Fast acting EXTREME CRYO GEL™ is a unique blend of 100% pure Emu Oil, Whole Leaf Aloe Vera, Willow Bark, MSM, Chondroitin and Glucosamine. **No other product on the market gives you all the benefits as EXTREME CRYO GEL™.**

ABOUT KEY INGREDIENTS

WHAT IS PURE EMU OIL?

Recent research indicates that emu oil does have anti-inflammatory and transdermal (through the skin) properties, allowing the product to be delivered directly to the areas of need.

WHAT IS ARNICA?

Used as a homeopathic medicine for hundreds of years to reduce inflammation and decrease.

The active components in arnica are sesquiterpene lactones, which are known to reduce inflammation and decrease pain. Other active principals are thymol (an essential oil, known to relieve pain and inflammation), flavonoids (potential use as an anti-inflammatory).

WHAT IS GLUCOSAMINE?

Hundreds of thousands of people have used Glucosamine, and many have found it extremely effective to not only effectively ease their arthritis pain but to also to provide them with far more than just long lasting pain relief. Glucosamine has been shown in clinical studies to regrow cartilage, slow the progression of arthritis, and possibly even modify the disease itself with almost no side effects.

3. Archives of Internal Medicine. 162(18):2113-23, 2002 Oct. 14

WHAT IS CHONDROITIN?

In our joints, it contributes to strength, flexibility and shock absorption. Current research indicates chondroitin helps maintain proper joint function.

WHAT IS ALOE VERA?

Extensive research since the 1930's has shown that the clear gel has a dramatic ability to heal wounds, ulcers and burns by putting a protective coating in the affected areas. Aloe is also known for its moisturizing effects on the skin.

RESEARCH PROVES EMU OIL CLAIMS VALID

LOWELL, MASS - For years people have touted the homeopathic benefits of emu oil.

Dr. Robert Nicolosi, Director of the Center for Health and Disease Research at the University of Massachusetts-Lowell, has been conducting research to evaluate these claims. "Animal trials indicate that emu oil does have cholesterol lowering, anti-inflammatory and transdermal properties," reports Nicolosi.

"Our research continues to investigate the many intriguing aspects of this oil. **The most recent conclusions are very promising for millions of Americans,**" said Nicolosi.

About MSC 100 Dromaius (EMU) Oil

From the land "down under" comes a natural wonder and now the secret is out. MSC 100 Dromaius oil (Emu oil) is a natural emollient and is used in diverse applications ranging from cosmetics to pharmaceutical uses. Our skin recognizes the harmony and allows MSC 100 Dromaius oil to be absorbed. MSC 100 Dromaius oil is a superb moisturizer and is unsurpassed for its ability to help alleviate dry, irritated skin. Research has demonstrated MSC 100 Dromaius oil helps thicken the skin therein reducing the appearance of aging.

What people are saying about Cryo Gel...

I have used your products for some time now. My favorite is the Cryo Gel Rub. I have used lots of analgesic rubs throughout the years for arthritis and osteoporosis and received very little relief. The Cryo Gel Rub has eased the pain and the swelling from these diseases almost completely. It has also helped the pain, bruises and swelling from a broken wrist I had recently.

--Carol Speck

One of my friends gave me a jar of Cryo Gel to try during a baseball game. As a pitcher, I expect a lot out of my throwing arm on and off the field. I started using Cryo Gel after I pitched to ease the pain, stiffness and speed up the recovery time so I could play the next day. Cryo Gel was the answer to all my problems. I now use Cryo Gel before my games to help loosen up my shoulder. Cryo Gel is part of my game plan. I recommend Cryo Gel to everyone. Thanks!

--Chad, Eastern OK State College (pitcher)
