

My wife has been suffering with neuropathy for a while and taking Lyrica for the pain. The Lyrica worked fine but had some side effects she didn't like....Nothing serious just annoyances.

I came up with this blend I call Neuro-Therapy to see if she can cut back on the Lyrica. After a couple of weeks she decided to stop the Lyrica because we really couldn't tell if the blend was working. As you might have guessed the blend does work. She applies the blend 2-3 times a day and that seems to be all she needs. Please note that the results may vary from person to person and you may not see any results for two weeks or so.

If you are taking any medication for neuropathy you must tell your doctor before using Neuro-Therapy. This blend has not been tested or approved by the FDA. It is a blend of pure essential oils. If any skin irritation develops discontinue use. Do not use around the eyes.

If you are pregnant let your doctor know before using. Not for internal use.
