Blends with	Patchouli, petitgrain, rose, sandalwood, ylang ylang

Information compiled from:

[Julia Lawless, The Illustrated Encyclopedia of Essential Oils (Boston, MA: Element Books, 1999)]

[Robert Tisserand, Essential Oil Safety (United Kingdom: Churchill Livingstone, 1999)]

[David G. Williams, The Chemistry of Essential Oils (United Kingdom: Micelle Press, 1997)]

General Safety Guidelines:

- Never use essential oils undiluted on the skin.
- Do not use essential oils on or near the eyes.
- Essential oils should not be taken internally.
- To check for allergic reactions or skin sensitization do a skin patch test before using a new oil. Place a small amount of the oil (diluted) on the inside of the forearm. If redness, itching, burning, or blistering occurs within 24 hrs. discontinue use.
- Some oils (such as citrus, pine) become sensitizing as they age. A good rule of thumb is to avoid using on the skin after about 6 months.
- If you have health conditions such as asthma, epilepsy, cancer, high blood pressure, etc. or are pregnant check the contraindications/cautions of the oils before use.
- Always use the smallest amount of oil that will do the job.
- Do not let children use essential oils without proper supervision.
- Essential oils are flammable. Keep away from fire and ignition sources.
- When in doubt consult with a qualified aromatherapist on the proper use of essential oils.
- Always remember that essential oils should never replace proper medical care. If you are under medical supervision consult with your practitioner before use.
- These safety guidelines are not to be considered complete and all-inclusive. When in doubt, consult your physician and/or a qualified aromatherapist.
