

Bay Laurel (laurel leaf)

www.aromaforlife.com

Botanical Name	Laurus nobilis
Part Used	Leaf
Origin	Crete
Class	Oxide (ether)
Extraction	Steam distilled
Color	Greenish yellow
Viscosity	Thin
Perfume Note	Middle to top
Aroma	Spicy-medicinal
Therapeutic Action	Antirheumatic, antiseptic, bactericidal, diaphoretic, digestive, diuretic, emmenagogue, fungicidal, hypotensive, sedative, stomachic
Uses	Dyspepsia, flatulence, loss of appetite, scanty periods, colds, flu, tonsillitis, viral infections
Constituents	1,8-Cineole, pinenes, sabinene, myrcene, limonene, linalool, methyl eugenol, others
Safety	Relatively non-toxic and non-irritant. Can cause dermatitis in some individuals. Use in moderation due to possible narcotic properties attributed to methyl eugenol. Should not be used during pregnancy.
Blends with	Pine, cypress, juniper, clary sage, rosemary, lavender, citrus and spice oils.

Information compiled from:

[Julia Lawless, The Illustrated Encyclopedia of Essential Oils (Boston, MA: Element Books, 1999)]

[Robert Tisserand, Essential Oil Safety (United Kingdom: Churchill Livingstone, 1999)]

[David G. Williams, The Chemistry of Essential Oils (United Kingdom: Micelle Press, 1997)]

General Safety Guidelines:

- Never use essential oils undiluted on the skin.
- Do not use essential oils on or near the eyes.
- Essential oils should not be taken internally.
- To check for allergic reactions or skin sensitization do a skin patch test before using a new oil. Place a small amount of the oil (diluted) on the inside of the forearm. If redness, itching, burning, or blistering occurs within 24 hrs. discontinue use.
- Some oils (such as citrus, pine) become sensitizing as they age. A good rule of thumb is to avoid using on the skin after about 6 months.
- If you have health conditions such as asthma, epilepsy, cancer, high blood pressure, etc. or are pregnant check the contraindications/cautions of the oils before use.
- Always use the smallest amount of oil that will do the job.
- Do not let children use essential oils without proper supervision.
- Essential oils are flammable. Keep away from fire and ignition sources.
- When in doubt consult with a qualified aromatherapist on the proper use of essential oils.
- Always remember that essential oils should never replace proper medical care. If you are under medical supervision consult with your practitioner before use.
- These safety guidelines are not to be considered complete and all-inclusive. When in doubt, consult your physician and/or a qualified aromatherapist.
